CORROSION
Eats Away Assets & Profits!

*Across all industries $500 Billion is spent annually to reduce the effects corrosion has on equipment and structures**

**2013 NACE Annual Study*

introducing a comprehensive solution to the age-old problem of corrosion:

CLEANWIRX™

- Reduces project costs
- Eliminates corrosion-causing contaminants
- Improves coating performance
- Reduces maintenance
- Reduces environmental impact
- Non-Toxic
- Biodegradable
- Ships Non-Hazmat
- Lasts for Decades!

There's nothing else like it.

Environmentally friendly, game-changing benefits apply across industries!

Customer Testimonial, March 4, 2011

In 1992 we applied the 1st generation of Cleanwirx™ on a 150-foot diameter crude oil tank and the laid down a fiberglass lining. We reopened the tank 15 years later in 2007 and the coating was still like new and has not required a recoating since the original treatment. Sinclair now specifies the use of Cleanwirx tm for tanks and vessels that have been, or will be, in corrosive environments.

Harold Gibson, Chief Engineer, Sinclair Oil Tank Services.

Customer Testimonial, January 16, 2012

I had heard about Loren Hatle and his surface decontamination technology through a mutual contact. I wanted to test his process and treated one of three sites that were under maintenance, the other two sites were treated the traditional blast then coat approach. Eleven years later, I invited Mr. Hatle back to visit the treated site. The project looked as good as it did the day it was treated.

Stephen R. Waguespack P.E. NACE Coating Inspector #445
